bsava manual of canine pdf

Lyme disease is a chronic, multi-systemic, inflammatory disorder of humans and animals associated with infection by the tick-borne spirochaete, *Borrelia burgdorferi*. There are a number of subspecies of *B. burgdorferi*, each adapted to a different type of wildlife. The principal vector in the UK is the tick *Ixodes ricinus* and animals become infected following a bite from an infected nymph or adult.
