All transport sectors are experiencing expansion (Table 1, Table 2) and unfortunately there is a general trend that the modes which are experiencing the most growth, are also the most polluting. Fig. 3a shows a breakdown of CO 2 emissions per passenger kilometre. Aviation and motor cars are increasingly the favoured modes for passenger transport, but are also significantly the most damaging.

London Tube trains regularly operate on a line that never appears on any Tube map. As one of the few examples of Underground car cascading, retired Tube trains have been operating on the Isle of Wight’s Island Line since 1967. This special relationship has lasted for decades, with two generations of retired Underground trains migrating south, like people, to retire by the seaside.
