Guidelines for Discussing Difficult or Controversial

Double-loop learning entails the modification of goals or decision-making rules in the light of experience. The first loop uses the goals or decision-making rules, the second loop enables their modification, hence "double-loop". Double-loop learning recognises that the way a problem is defined and solved can be a source of the problem.

Reflective practice is a core skill – it is an active, dynamic process to be honed through life-long experiential learning. In time, we get the reflective practice skill set where reflection becomes automatic, so much so that unless we stop to think about it, it is embedded in our professional persona.

Reflective Practice. Reflective Practice is a modern term, and an evolving framework, for an ancient method of self-improvement. Essentially Reflective Practice is a method of assessing our own thoughts and actions, for the purpose of personal learning and development. For many people this is a natural and instinctive activity.

Training is about teaching or instructing a particular skill or knowledge and is normally given in a formal environment.. Coaching, on the other hand, is about increasing an individual's knowledge and thought processes with a particular task or process. It creates a supportive environment that develops critical thinking skills, ideas, and behaviors about a subject.
