This is a list of file formats used by computers, organized by type. Filename extensions are usually noted in parentheses if they differ from the file format name or abbreviation. Many operating systems do not limit filenames to one extension shorter than 4 characters, as was common with some operating systems that supported the File Allocation Table (FAT) file system.

Hey man, Looks nice! Have been thinking about getting my Ubuntu on for a while, so will have a play and see. Other programs you may like for your list are Mendeley a dynamite referencing program which kicks Endnote's bum. As soon as I download a pdf through my browser, Mendeley picks it up, copies it to its own referencing subfolders, and searches for the doi.
