These word-wheels are designed as 5-minute starters for secondary students, although they might also be of use to upper primary classes. I use these maths word-wheels to help improve general maths vocabulary and I have found that they provide excellent motivation for students to learn the abbreviations, prefixes, the units of measure, and even the Greek alphabet!

Mathematics has no generally accepted definition. Aristotle defined mathematics as "the science of quantity", and this definition prevailed until the 18th century. Galileo Galilei (1564–1642) said, "The universe cannot be read until we have learned the language and become familiar with the characters in which it is written. It is written in mathematical language, and the letters are ...
