Want to save a document or web page as a PDF file, but you don't own Adobe Acrobat? No problem, you can print documents, webpages, or nearly anything as a PDF, this means it creates a PDF file directly in Mac OS X using a built-in feature, without the need for any additional software or apps.

How to Print to PDF in Mac OS X

As of August 29, 2014, Google has decided to intentionally break old browsers. They say it's not a bug, it's by design here, even though Google's support page says it accepts Safari 4 as a fully supported browser. If you want Google searches to go back to the modern style, you need to change your User-Agent string.

Top 10 DTrace scripts for Mac OS X. Since version 10.5 "Leopard", Mac OS X has had DTrace, a tool used for performance analysis and troubleshooting.It provides data for Apple's Instruments tool, as well as a collection of command line tools that are implemented as DTrace scripts. I'm familiar with the latter as I wrote the originals for the DTraceToolkit, which Apple then customized ...
