The problem with levels- gaps in basic numeracy skills identified by rigorous diagnostic testing. by William Emeny · 03/07/2015

The problem with levels- gaps in basic numeracy skills

In gambling parlance, making a book is the practice of laying bets on the various possible outcomes of a single event. The term originates from the practice of recording such wagers in a hard-bound ledger (the 'book') and gives the English language the term bookmaker for the person laying the bets and thus 'making the book'.

Mental calculation comprises arithmetical calculations using only the human brain, with no help from any supplies (such as pencil and paper) or devices such as a calculator. People use mental calculation when computing tools are not available, when it is faster than other means of calculation (such as conventional educational institution methods), or even in a competitive context.

Mental calculation - Wikipedia

Quizzing is seen as rote learning of information that the learner will then find difficult to actually understand with any depth. So retrieval practice and quizzing is learning strategy which does more than just enabling children to recall facts and figures whether quiz is related to guessing the celebrity, fun quizzes, sports quiz or matching yourself with the movie characters.
