

SQUIRRELS AND THEIR NESTS ANIMAL HOMES

squirrels and their nests pdf

A drey is the nest of a tree squirrel or a flying squirrel. Dreys are usually built of twigs, dry leaves, and grass, and typically assembled in the forks of a tall tree. They are sometimes referred to as "drey nests" to distinguish them from squirrel "cavity nests" (also termed "dens").

Drey - Wikipedia

Figure 3. Flying squirrels can glide 150 feet or more from a height of 60 feet. They don't actually fly, but glide downward through the air using skin flaps that stretch between their front and rear legs, forming two "wings."

Tree Squirrels - Living with Wildlife | Washington

Signs of Squirrels. All tree squirrels may build or use stick and leaf nests and some use tree cavities for denning.

Western Gray Squirrels and Other Squirrels of Washington

It has long been believed that squirrels forget their hiding places and are forced to rely on smell to retrieve them. Any acorns still lost would have the chance to grow into trees.

11 Bushy-Tailed Facts About Eastern Gray Squirrels

Trimming trees with babies in mind. Trees aren't just part of a beautiful garden offering shade and sometimes even tasty fruits. They're also home to bird and squirrel nests which are sometimes full of little babies.
