Planting Date Guidance for Restoration BMP Projects

C. Growing from cuttings A cutting is a branch taken from a mature tree, rooted and planted in a pot / soil. Cutting growing is faster than growing from seeds and it is almost the only way to assure the new tree (= second generation) will be with the same flower color to the tree the cutting was taken from (=mother tree, first generation).

Starting tomato plants from cuttings is a fast and easy project that even beginners can do blindfolded.

How to Start Tomato Plants from Cuttings - Vegetable Gardener

Crassula ovata, commonly known as jade plant, lucky plant, money plant or money tree, is a succulent plant with small pink or white flowers. It is native to South Africa and Mozambique, and is common as a houseplant worldwide. Much of its popularity stems from the low levels of care needed; the jade plant requires little water and can survive in most indoor conditions.
