Wind-and-fire wheels (simplified Chinese: 风火轮; traditional Chinese: 風火輪; pinyin: feng huo lun) are mêlée weapons, wielded as a pair, associated with Chinese martial arts such as baguazhang and taijiquan. Visually, they are similar to chakrams, although unlike chakrams they are not throwing weapons.. Each wheel is a flat metal ring approximately 38 cm (about 15 inches) in diameter.

Wind and fire wheels - Wikipedia

Etymology. The English word wheel comes from the Old English word hweol, hweogol, from Proto-Germanic *hwehwlan, *hwegwlan, from Proto-Indo-European *k w ek w lo-, an extended form of the root *k w el-"to revolve, move around". Cognates within Indo-European include Icelandic hjól "wheel, tyre", Greek κύκλος kúklos, and Sanskrit chakra, the latter two both meaning "circle" or "wheel".

Designed to expand up to 5 times in volume after dispensing, 3M™ Fire Barrier Rated Foam FIP 1-Step is a two-part urethane, smoke, sound and firestopping foam. This intumescent foam can be used to fill the annular space created by pipes and cables penetrating through fire-rated construction. It's an alternative to mineral wool, bricks, pillows and runny, ineffective foams and is UL listed.

Oregon Fire District Directors Association was founded in 1950 when a group of like-minded individuals connected over the desire to form rural fire protection districts in Oregon. The founders understood, as we do today, that working together creates greater opportunities for Oregon's fire service.
